

BASIC MUSIC NOTATION CHART
BRAILLE MUSIC CODE
© Richard Taesch

This is a fairly comprehensive guide for those new to the oddities of music braille. The chart is clear and easy to use for braille readers. A print facsimile may become available at a later time.

Some of the signs and devices included are as follows:

- basic notation
- note values
- time signatures
- special endings
- octave signs
- intervals
- chord symbols and "picture chord" charts for sheet music

The [file is Braille Ready Format](#) (.brf) and can be opened with a Braille display device. Global settings should be for a 40-cell music line with 25 lines per Braille page. The file may be compatible with a smaller display device. There are six Braille pages in the file. [Download here.](#)
